

Unit	Description	Weightage* (%)
1.	Introduction to Java <ul style="list-style-type: none"> - The Java programming language: history, evolution, features - Introduction to the Java programming environment, JDK, JRE - Introduction to the IDE - Data types and wrapper classes, operators - Control structures - String handling - Basic Input-output 	25
2.	Introduction to Object-oriented Programming <ul style="list-style-type: none"> - Basic concepts of object-oriented programming - Classes, instances, methods - Static and non-static members - Packages - Inheritance and polymorphism, method overriding - Final and abstract classes, abstract methods - Interfaces - Generics, enumeration - Inner classes and anonymous classes - Class loaders, class path 	25
4.	Developing Graphical Programs and Database Access <ul style="list-style-type: none"> - An introduction to graphics in Java - Brief introduction to AWT - The Swing library - Writing graphical programs using Swing - Using various Swing components - Managing layout using Swing - Event handling using Swing 	25

1.	Introduction <ul style="list-style-type: none"> - Software – meaning and applications - Software Engineering – meaning, goal, challenges and approach - Software Process - Software Development Process Models – waterfall, prototyping, iterative, time boxing and spiral - Introduction to Agile Computing - Agile Software Development Approaches (Scrum, eXtreme Programming, Feature Driven Development, Dynamic Driven Development) - Collaborative User Story Creation, Retrospectives, Continuous Integration, Release and Iteration Planning 	25
2.	Software Requirement Analysis and Project Management <ul style="list-style-type: none"> - Software Development Life Cycle (SDLC) - Software Requirements Specification (SRS) – Need, Process, Problem Analysis, Requirement Specifications, structure and components, Functional Specifications using Use Cases - Software Project Management : Project Planning, various issues addressed in Project Planning, Effort Estimation - Work Breakdown Structure (WBS) 	25

1.	Client-side Web Technologies - I <ul style="list-style-type: none"> - Introduction to HTTP and HTML5 - URL format - HTML5 document structure - Headers, body, declarations - Elements, element ID, name, attributes, events - HTML5 media - Forms - HTTP Verbs - Introduction to the DOM - Introduction to CSS3 - CSS3 Syntax - Different properties, values and units - Specifying colors 	25
2.	Client-side Web Technologies - II <ul style="list-style-type: none"> - CSS3 selectors, classes - CSS3 precedence rules - Introduction to media query - Introduction to JavaScript - JavaScript syntax - Variables: declaration, data type - Strings, numbers, arrays - Operators - Functions - Variable scope 	25
	<ul style="list-style-type: none"> - Event handling - Client-side form validation - DOM access and manipulation from JavaScript - Built-in objects 	

3.	Server-side Web Development Using PHP – I <ul style="list-style-type: none"> - Introduction to server-side scripting - Introduction to PHP - Data types, variables, constants, operators - Flow Control and looping - Strings, arrays, functions - Regular expressions, server-side input validation - Superglobals - Maintaining state: sessions, cookies, query parameters, hidden fields 	25
4.	Server Side Web Development Using PHP – II <ul style="list-style-type: none"> - Introduction to MySQL - Database Connectivity in PHP - Introduction to object-oriented programming with PHP 	25

1.	The .NET Technology <ul style="list-style-type: none"> - Introduction to .NET Framework - Architecture of .NET framework – BCL (Base Class Library), CLR (Common Language Runtime), etc. - .NET Languages – introduction, Types of applications supported by .NET Technology - Managed code, compilation to intermediate language, Just-In-Time compilation, garbage collection, assemblies and the GAC 	25
2.	Language basics <ul style="list-style-type: none"> - C#.NET – Introduction and features - General structure of C#.NET program - C#.NET – basic data types, variables, constants, type conversion - boxing and unboxing - C#.NET – statements (conditional and looping) - Console Applications, Windows Applications - Windows Forms and Life Cycle - User interface controls - Basic Controls, Dialog controls, Menu control 	25

Unit	Description	Weightage* (%)
1.	Introduction to Cybercrime <ul style="list-style-type: none"> - Cybercrime : Definition And Origins Of The World - Cybercrime And Information Security - Who Are Cybercriminals? - Classifications Of Cybercrimes - Cybercrime: The Legal Perspectives - Cybercrimes: An Indian Perspectives - Cybercrime And The Indian ITA-2000 - Cyber Offenses: How Criminals Plan The Attacks - Social Engineering - Cyberstalking - Botnets 	25
2.	Tools and Methods Used in Cybercrime <ul style="list-style-type: none"> - Password Cracking - Key Loggers And Spywares - Virus And Worms - Trojan Horses And Backdoors - DoS And DDoS Attacks - SQL Injection - Buffer Overflow - Phishing - Identity Theft - Networking Commands 	25
